# Message from our President and CEO

Robert J. Trenchel, D.O., MPH

In 2025, we move forward as Onvida Health with renewed optimism—grounded in who we are, energized by where we’re going, guided by our purpose, pillars and values.

Nearly a decade ago, Yuma Regional Medical Center was the community’s only hospital. Today, we are an innovative health system with more than 40 locations and 50 specialties. Most importantly, we’re neighbors, friends, and family. We care deeply about the people we serve because this is our community, too.

Over the past 10 years, we’ve evolved with purpose. Our focus on quality, culture and access has transformed how care is delivered across our region. We’ve expanded services, strengthened our clinical teams, and improved the patient experience in meaningful ways.

We’re proud to be the region’s largest private employer and a driving force for economic stability and growth. At the same time, we must be thoughtful about the realities ahead. Medicare and Medicaid account for 83% of our patients—a significantly higher rate than the state average – creating real pressure as reimbursement rates fall far below the cost of providing care. As healthcare policy continues to evolve, navigating our unique payer mix is critical to continue investing in innovation and maintaining the quality of care our community deserves.

There is always more work to do, but we are listening more closely, improving more intentionally, and holding ourselves to higher standards.

The future is bright because of the people behind this work – clinical and support teams, providers and volunteers. Together, we’ll continue building a healthier tomorrow for our neighbors, for our friends, for our families and for our region.

A handwritten signature in black ink, appearing to read "R. J. Trenchel". The signature is fluid and cursive, with a large, sweeping flourish at the end.

Robert J. Trenchel, D.O., MPH

PILLARS

### Putting Patients First

We see patients for who they are. Patients and families are at the center of every decision and action we take.

### Rooted in the Community

We're an integral part of this community; neighbors caring for neighbors. We live and breathe the dynamic nature of our region.

### Committed to Progress

We constantly and consistently advance healthcare, create meaningful experiences and improve the lives of everyone around us.

VALUES

### Bring kindness

We create human connections by being more than just nice.

### Achieve Together

We each contribute in our own ways, and collectively accomplish more.

### Aspire for Better

We are steadfast. Putting in the quality time and hard work, always striving for better.

### Do the Right Thing

We act with honesty and integrity for the good of those around us.

### Lead with Optimism

We build a hopeful future by celebrating moments, big and small.

# *Introducing the Onvida Health Spark to the Community*

Onvida Health's community relations team  
celebrates the past and the future.

# A New Name Rooted in Purpose

Inspired by the Spanish word *vida*, meaning “life,” Onvida Health reflects a deep belief in caring for the whole person—supporting not just healthcare needs, but the moments, connections, and experiences that make a healthy life possible. When the name was introduced in 2024, it represented more than a rebrand; it became a visible expression of growth, momentum, and a strengthened commitment to Yuma County.

Today, that commitment is rooted in our purpose of “building a healthier tomorrow.” It comes to life in the way we care for one another—shaping a culture where our values guide everyday moments and empowering our teams to deliver compassionate, patient-centered care while strengthening the connections that make this community so special.

You can see that commitment taking shape in meaningful ways. From a first-of-its-kind partnership with the University of Arizona College of Medicine–Phoenix to establish a rural medical school branch, to breaking ground on the new San Luis Medical Campus, to launching an area health education center to help grow the next generation of caregivers—each step reflects what we’ve heard from our community and the future we’re building together.

As we’ve grown, we’ve been thoughtful about ensuring our brand reflects who we are today—and who we’re becoming. We are more than a hospital; we are a trusted partner and a pillar of this community, expanding access to care while building lasting relationships with the people we serve.

Our name continues to guide us. It speaks to optimism, to celebrating life’s moments, and to our shared commitment to better care, better health, and a brighter future for our patients and their families—the people who inspire us every day. We’re here to deliver access to high-quality care and service to a place we call “home.”

## The Onvida Spark

Our creative expression - **a spark**

Built to be bright. It signals an arrow moving us forward into a healthier tomorrow. It also represents the sun, a reflection of Yuma -the sunniest place on earth.

The spark is for you - your energy, laughter and love for life! We want to keep that spirit going strong to give you the latest, best care when you need it.

**Top: Community Health Needs Assessment identified needs**  
**Bottom: Demonstrates what we delivered in response**

Needs  
Deliverables

## Building a Healthier Tomorrow Together

Every three years, Onvida Health completes a Community Health Needs Assessment (CHNA) with the goal of identifying and evaluating health-related needs of the communities we serve, then using the information to fulfill our mission.

Our 2025 CHNA identified access to healthcare services as our patients’ top need. This longstanding priority remains central to our focus on delivering high-quality, accessible care close to home.

We believe that feedback from local residents should directly shape investments, demonstrating that healthcare systems must listen to – and evolve with – the communities they serve. As the timeline reflects, the insights gleaned from our periodic assessments have shaped our approach for more than a decade.

We remain deeply responsive to community needs, elevating the CHNA into a cornerstone of organizational strategy. We will continue to listen to and respond to the needs of the community so we can deliver the care our patients need and deserve.

2019

- Behavioral Health identified as top need
- Continued need for primary care and specialists
- Data shows high % substance use
- YRMC quality continues to improve + national recognition

2021

2022

- Mental health and substance use rise as top need
- Access to healthcare improves, recruitment remains a top priority
- Customer service / experience needs identified

2023

2025

- Access to healthcare continues to improve, recruitment remains a top priority for both primary and specialty care
- Behavioral Health remains a top need
- Customer service / experience improves, remains a top priority

2025

2020

- AHA Quest for Quality
- **206** cumulative providers recruited
- **35** new and expanded services

2022

- YRMC opens COVID Vaccine Clinic at Civic Center
- Baldrige Quality Award

2024

- Behavioral Health Inpatient opens + Intensive Outpatient Therapy
- 5th Surgical Robot and expanded surgeon expertise
- AWC/YRMC Partnership to expand health careers locally
- Added a 5th operating room at Outpatient Surgery Center
- Expanded Family & Community Residency program
- Foothills campus over **23K** visits & Emergency over **21K** visits

2026

- Behavioral Health
  - Went from 1 psychiatrist to **9**
  - New Behavioral Health programs for military, law enforcement and adolescents
- Welcomed **21** new providers (Net gain)
- Increased pediatric and primary care appointments by nearly **4%**
- Robotics expands to **12** surgeons and **7** robots
- Digital Reputation: Main Campus & Emergency achieve 4-Star Google rating and over **40** clinics with 4+ Google rating
- Groundbreaking San Luis campus
- San Luis Family Medicine clinic expanded care + added provider
- Medicine residency grows to **38**
- Launched psychiatry residency (4 residents started in July)
- Medical Group (under leadership of Dr. Kristina Diaz) signed **100+** new providers for community

- Hired first Chief Experience Officer
- Endoscopy Center (Ave B) opens
- Foothills Campus opens + includes Emergency Dept.
- Psychiatry residency – recruits director
- Added **22** new physicians & **16** Advanced Practice Professionals (APPs)

Griselle Alcalan and her family

*"I'll always be grateful to the Onvida Health heart team for giving me more time with my family. Being able to watch my boys perform on stage is a gift beyond words."*

Griselle Alcalan

## The Power of Coordinated Heart Care

Heart care is often defined by what happens in the first few minutes, but recovery and survivorship depend on everything that follows. For Yuma resident Griselle Alcalan, it was an orchestrated effort among Onvida Health's emergency care, cardiac intervention, and long-term support to achieve a second chance at life.

After experiencing uncommon heart attack symptoms and becoming unresponsive, Griselle was transported to Onvida Health, where a multidisciplinary team of specialists moved quickly to restore blood flow and stabilize her condition. Within minutes of arrival, she was in the cardiac catheterization lab, where physicians treated a 100% blocked artery.

Griselle's condition was complex, but over the next 10 days, Onvida Health's cardiac and ICU teams worked around the clock to support her recovery. After going into cardiac arrest multiple times, her heart was not strong enough to pump blood effectively. Our medical team quickly inserted two stents to restore blood flow and placed an Impella device to help her heart circulate blood and stabilize her condition. Led by Dr. Evren Kaynak, the Onvida Health heart team delivered a level of responsiveness, compassion, and coordination that her family credits with saving her life.

Her recovery did not end at discharge. Through Onvida Health's Transitional Care and Cardiopulmonary Rehab, she rebuilt her strength with the support of passionate experts. Griselle also developed a trusted, ongoing relationship with Dr. Kaynak that she expects will last a lifetime.

Griselle's experience reflects Onvida's commitment to providing passionate, responsive, high-quality care for patients every step of the way.

### Ladies, Listen to Your Heart

Like many women, Griselle did not initially recognize the symptoms of a heart attack, mistaking them for something less serious. It wasn't until her husband and son found her unresponsive — and performed CPR before EMS arrived — that the severity of the situation became clear.

Today, her story is one of recovery and resilience. She is back at work full time, cheering on her sons at their theater performances, and doing cardiac rehab twice a week. Her experience is a powerful reminder to recognize the early warning signs and seek care when something doesn't feel right.

*"This program represents hope,  
progress, and a deep commitment  
to the people we serve."*

Antonia Gore, M.D.

*Onvida Health Psychiatry Resident*

# A New Generation of Healing and Hope

As Yuma continues to grow, so does the need for accessible, high-quality behavioral health services. In 2025, Onvida Health took a significant step forward with the launch of our Psychiatry Residency Program, strengthening care delivery and building a pipeline of providers for the future.

Rural residency programs provide medical professionals opportunities specific to rural communities, a draw for new doctors like first-year psychiatry resident Dr. Antonia Gore. “I have always been passionate about serving medically underserved

the work. Residents are not only gaining skills—they are becoming part of something meaningful, contributing to a healthier future for the entire region. This spirit is guided by leaders like Dr. Eyuel Terefe, Psychiatry Residency Program Director, who is dedicated to creating an environment where physicians feel supported, inspired and connected to the community they serve. “Knowing I am part of a community that is actively investing in its future motivates me and makes me hopeful about the impact we can continue to make together,” said Dr. Terefe.

***“Our Community Health Needs Assessment implements a close, listening-based approach to fulfill what our community needs. Our commitment extends beyond delivering care. We are members of this community and partners in its well-being.”***

Miguel Tosado, M.D., *Psychiatrist and Residency Faculty*

communities, and Yuma offered the opportunity to do that in a meaningful way,” said Dr. Gore.

Resident physicians provide care across inpatient, outpatient and integrated medical settings. They also lead community advocacy efforts, including screenings, school programs, and wellness education initiatives that promote prevention and reduce stigma.

Onvida Health’s psychiatry program reflects our unwavering commitment to whole patient care. By combining academic excellence with hands-on, locally grounded experience, we are preparing a new generation of psychiatrists trained to treat the physical and emotional well-being of their patients while serving diverse populations with compassion and cultural awareness.

Beyond building clinical expertise, the program also fosters a deep sense of pride and purpose in

Just as importantly, training physicians locally increases the likelihood they will stay. Building on the success of the Family Medicine Residency Program, we’re creating a sustainable model for long-term behavioral health access.

“Training in Yuma has made me seriously consider staying here after graduation,” says Dr. Gore. “The sense of fulfillment I feel when helping patients, the strong community relationships, and the supportive environment created by the program have all shown me how meaningful it is to practice in a place where your work truly matters.”

This work reflects our broader vision—to invest in people, strengthen our community, and ensure every individual has access to compassionate, high-quality care close to home, today and for generations to come.

# The Future of Healthcare Starts Here

Yuma is more than a service area for those of us at Onvida Health. It is home. It is where our children go to school, where our families gather, and where the next generation of caregivers are growing up.

We believe the future of healthcare in our region starts with our own youth. Through our Healthcare Career Camp and partnerships with Arizona Western College, Mentor Me MD, and local educators, we are introducing students to careers in medicine and showing them they can build a future in healthcare right here in Yuma.

By investing in local students while welcoming experienced providers from beyond our borders, we are building a stronger healthcare system for today and creating opportunity for tomorrow. It is a commitment rooted in pride, partnership, and the belief that Yuma deserves the very best care, close to home.

## We launched several transformational initiatives to strengthen that pathway:

- Announced an innovative partnership with The University of Arizona College of Medicine – Phoenix to launch Arizona's first rural regional medical school branch.
- Broke ground on the new **30,000-square-foot Health Careers Center** in partnership with Arizona Western College, an innovative facility set to open to students in early 2027 that will expand training programs and help build a strong, homegrown healthcare workforce for the region.
- Partnered with Southwest Technical Education District of Yuma (STEDY) to provide local high school students with medical career learning and create hands-on healthcare career pathways.
- Established the Southwest Health Education Collaborative and a new Area Health Education Center (AHEC) with Arizona Western College and Sunset Health, engaging 2,500 students across Yuma, La Paz, and Mohave Counties.

# Raising the Standard for Breast Imaging in Yuma

*"With 3D, you're looking at tiny slices throughout the breast. This makes it easier to detect abnormalities that 2D mammography might miss."*

Kale Bodily, M.D., *Diagnostic Radiologist*

Having access to advanced technology and board-certified breast specialists is a life-saving difference, especially when early detection matters most. Onvida Health offers nationally recognized breast imaging and diagnostic care typically only available in metropolitan areas.

In 2025, we were recognized as the region's only Comprehensive Breast Imaging Center by the American College of Radiology, a rare national designation for a rural community that reflects the highest standards in accuracy, safety, and patient-centered care. This designation illustrates the importance of access to leading-edge screening and diagnostic services without having to leave Yuma County.

To further enhance care, Onvida Health has invested in advanced 3D mammography technology that delivers more detailed and accurate images. For patients, this means access to advanced breast imaging—without the need to travel up to 185 miles for the nearest 3D mammography services. This technology can detect up to 40% more cancers, particularly in early stages, while reducing unnecessary call-backs by up to 30%, helping ease anxiety and avoid additional testing whenever possible. We are also proud to offer Contrast-Enhanced Mammography as an advanced, fast breast cancer screening tool, particularly beneficial for women with dense breast tissue, high risk factors, or when MRI is not feasible.

With state-of-the-art imaging and a dedicated care team, Onvida Health remains committed to providing answers sooner, reducing uncertainty, and ensuring every patient feels informed, supported, and confident in their health journey.

## Mammography by the numbers

**20,000+**  
mammograms at  
Onvida Health each year

# Recruiting the Right Talent for Yuma County

Behind every new clinic, expanded service line and shorter wait time is something essential: the right providers choosing to bring their talent, expertise and compassion to Yuma.

In 2025 alone, Onvida Health recruited more than 114 physicians and providers — an important milestone that reflects our purpose of building a healthier tomorrow.

Providers are drawn to Onvida Health for many reasons, including access to advanced technology and the ability to work alongside highly skilled teams. But what keeps many of them here is the chance to make a meaningful difference in a community where their work truly matters.

Every new provider helps improve access to care across Yuma County and the surrounding region. More physicians mean shorter wait times, expanded specialty services and fewer patients needing to travel long distances for care.

This growth is especially important in rural and border communities, where access to healthcare can be limited. By continuing to recruit talented providers across a wide range of specialties, Onvida Health is helping ensure patients can receive high-quality care close to home.

*“We identified barriers that delayed timely care and knew we needed to plan ahead for retirements and staffing changes. Ultimately, it’s about meeting the needs of our community.”*

Kristina Diaz, M.D., M.B.A  
President, Onvida Health Medical Group

Front: Rochelle Gaudet, M.D., *General Surgeon*  
Back: Simon Lavotshkin, M.D., *General Surgeon*

# Talent, Technology & Transformational Care

*"Onvida stands out because it actively invests in cutting-edge technology, with an OR staff fully trained and ready."*

Dr. Rochelle Gaudet, Onvida Health General Surgeon

At Onvida Health, investing in advanced technology is ultimately about people—making care better for every patient who walks through our doors and creating an environment where highly skilled physicians want to practice.

That commitment was reflected in a major 2025 milestone: more than 5,000 robotic-assisted surgeries performed using the Da Vinci Xi system. Behind that number are thousands of patients experiencing less pain, faster recovery, and better outcomes—returning sooner to their families, their work and their daily lives.

For general surgeon, Dr. Rochelle Gaudet, those outcomes are what matter most. "A robotic approach has been life changing for many people in the community," she says. "It directly benefits patients, leading to less pain, less blood loss, faster recovery and lower long-term complication rates."

With 24-hour availability for emergency procedures, patients in Yuma can receive advanced, minimally invasive care close to home. "Our robotic case volume continues to be highly impressive, reflecting both institutional commitment and surgeon expertise," Dr. Gaudet adds.

Just as importantly, the program is a powerful recruitment tool—because talent attracts talent. Led by Dr. Simon Lavotshkin, one of the nation's most experienced robotic surgeons, Onvida Health is one of the busiest Da Vinci Xi robotic sites in the nation in general surgery, gynecology and urology. Surgeons are drawn to a place that is continually investing, improving and supporting their ability to deliver the highest level of care.

## Robotic Surgery by the Numbers

**Benjamin Gammon, M.D.,  
Emergency Department**

# High Quality Emergency Care You Can Count On

When an emergency strikes, every second matters, and so does knowing where to turn. At Onvida Health, patients can count on timely, compassionate care delivered by board-certified emergency physicians, 24/7. With dedicated pediatric emergency services and onsite cardiology support, the Emergency Department is equipped to care for patients of all ages and respond quickly to even the most critical heart-related conditions.

In 2025, Onvida Health made meaningful progress in improving the emergency care experience. Through operational enhancements, average arrival-to-departure times have dropped to under four hours, outperforming national benchmarks, while continuing to serve more than 70,000 patients each year.

Initiatives like expanded Fast Track hours, additional surge staffing, and virtual screenings have streamlined care and reduced wait times. Pediatric services at the Main Campus further ensure families have access to specialized care when they need it most.

This same high standard of care extends beyond the main hospital. At Foothills Medical Plaza, Onvida Health's Emergency Department brings convenient, high-quality emergency services closer to home for patients in that growing community.

When the unexpected happens, our team at Onvida Health is there, ready to prioritize your care with expertise, compassion and urgency.

# Innovation with a Human Connection

Providing our community with the highest level of care and access to advanced healthcare services close to home has always been our purpose at Onvida Health. Through investment in innovations that improve efficiency, reduce staff burnout, and enhance clinical outcomes, we're able to deliver on that mission by providing for our dedicated care team.

In 2025, we made significant advancements in each of these areas through investments in point-of-care solutions, advanced surgical technologies, and AI. Additional innovations, include:

- Launched a multi-site pilot with Ambience Healthcare to bring AI-powered documentation into Epic, helping clinicians spend less time on administrative tasks and more time with patients—enhancing care quality, supporting well-being, and strengthening accuracy and compliance across all care settings.
- Introduced Epic Rover, a bedside mobile tool that empowers nurses to access and document patient information in real time—reducing time spent on administrative tasks, enhancing safety and accuracy, and allowing caregivers to focus more fully on meaningful patient connections and compassionate care.

Each of these innovations builds on our commitment to delivering high-quality care through thoughtful investment in technology. We will continue building on this progress in 2026 and beyond, combining advanced technology with the expertise and compassion of our care team to deliver the highest quality care to our community.

## Technology that Gives Time Back to Care

# Transforming Community Support into Action

As a community-first organization, since 1976, the Foundation of Onvida Health has helped drive meaningful change across Yuma County by supporting programs, services, and innovations that improve lives. In 2025, that impact continued to grow.

Foundation investments supported a wide range of initiatives, from free lung cancer and mammography screenings to the Cancer Resource Center, providing essential support for patients and families. Programs like *Reach Out and Read* and *Healthy Kids* help children and families build the foundation for lifelong health and wellness. The Foundation also expanded community education efforts through water safety workshops, equipping local caregivers with the knowledge and resources to help prevent childhood drowning.

The Foundation is helping build the future of healthcare in our community by investing in the next generation of caregivers. In 2025, it awarded \$112,625 in scholarships to 37 local students, helping remove financial barriers and create pathways into high-need medical fields. This support empowers individual success and helps ensure tomorrow's workforce is skilled, prepared, and rooted in the communities they will serve.

These efforts exemplify the Foundation's commitment to a stronger, healthier Yuma, now and for future generations.

## The Foundation's 2025 Investments

**\$693,867**  
distributed to support  
patients, programs,  
and services

**\$77,806**  
provided to patients  
and families facing  
medical hardship

**\$114,020**  
invested in advancing  
cancer care

**\$389,416**  
supported patient  
services, equipment,  
and clinical programs

# A Stronger Economy Sparks a Healthier Future

While our primary focus is the health and well-being of every patient we serve, we also understand a strong healthcare system supports a strong local economy. As Yuma’s largest private employer, Onvida Health plays a vital role in driving regional economic stability and growth.

**In 2025 alone, our impact included:**

- 8,800 jobs supported, including direct employees (this makes up 14% of all Yuma County area employment)
- \$693.3 million in labor income generated
- \$41.6 million in state and local tax revenue
- \$1.5 billion in total economic output

Our workforce, which is among the most educated and highest earning in the region, has grown by

more than 12% since 2019, reinforcing both the quality of care we provide and the economic vitality we help sustain. Jobs within the Yuma county area have grown by 1.3% year over year for the last seven years with Onvida Health being the largest new job contributor. That influence extends beyond healthcare, supporting industries from construction and utilities to retail trade and transportation.

As we expand through projects like the San Luis Campus and the Yuma Veterans Affairs Outpatient Clinic, we are strengthening healthcare access while advancing the economic foundation that helps attract new talent, new businesses, and long-term opportunity to our community.

## NEW FACILITIES COMING SOON!

Above: Rendering of the new Yuma VA Outpatient Clinic  
Below: Rendering of the new San Luis Medical Campus

# Investing in our Community for a Brighter Future

We believe great care should feel close to home, easy to access, deeply connected to the community, and designed around the people it serves. For many families in south Yuma County, getting advanced medical care has too often meant long drives and time away from what matters most. That's changing. Our expansion into the south county is all about making excellent healthcare more accessible, right where people live, work, and raise their families.

Construction is now underway on our San Luis Campus, with doors set to open in 2027. This new campus is designed with the future in mind and will feature a next-generation hospital with inpatient and observation beds, a full-service emergency department, operating and recovery rooms, advanced imaging, and access to a wide range of specialty care. When it opens, residents will be able to connect with more than 350 physicians and specialists without leaving their community. Along the way, the project is also creating new jobs, strengthening the local workforce, and supporting continued growth across the region.

We're also proud to be expanding care for those who have served our country. Earlier this year, we broke ground on a new Veterans Affairs outpatient clinic in Yuma. With such a strong and proud military presence in our region, this investment ensures veterans and active-duty service members have access to timely, high-quality care close to home, now and for years to come.

*83% of our patients are covered by government-sponsored programs such as Medicare and Medicaid*

Providing care to all who need it is always our priority. And with 83% of our patients covered by government-sponsored programs such as Medicare and Medicaid, we closely monitor reimbursement changes, strengthening operational efficiency, and advocating for sustainable funding to ensure continued growth. Through strategic planning and innovation, Onvida Health is not only maintaining financial stability but also reinvesting in expanded services, advanced technology, and a strong workforce, helping build a healthier, more resilient future for our region.

## Charity Care

**\$25 million**  
in charity care

Caring for our community means ensuring every person has access to healthcare, regardless of their ability to pay. Through our commitment to charity care, we help remove financial barriers so individuals and families can receive the services they need close to home. It is one of the most meaningful ways we live our purpose and invest in the health and well-being of our region.
